

Barangay Performance Index Ramon Magsaysay

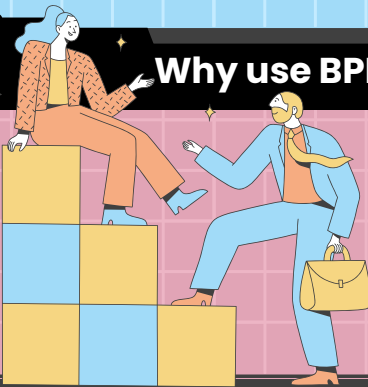

Empowering Communities Through Compliance and Excellence

What is BPI? 01

The Barangay Performance Index (BPI) is an online tool developed by DILG Ramon Magsaysay Field Office to monitor and track the performance of the 27 barangays based on their compliance to national laws and DILG policies

02 Why use BPI?

- data collection involving barangays submitting reports and BBI Functionality
- comparison of performance of the barangays using Ranking System
- visualization to display the performance of barangays

Who can use BPI? 03

1. LGUs: to oversee the performance of component barangays
2. Barangay Officials: to use the tracker to monitor their own performance & identify areas where they need to focus their efforts
3. General Public: public can engage in community discussion related to barangay planning and development, providing feedback and input on performances

04 Where to visit BPI?

Any one can visit BPI Website without logging in or subscribing:

<https://bpi.lgrcrm.com/>

How to use BPI? 05

Once you are in the homepage, click on the above menu to view BPI per quarter.
